WRITING TEST PLANS

Documenting test cases and your reasoning

TEST PLANS DOCUMENT

- ○ what we will test in functional terms, and

TEST PLANS DOCUMENT

- what we will test in functional terms, and

- Test cases are implemented in code

TEST PLANS DOCUMENT

- what we will test in functional terms, and

- Test cases are implemented in code

- Test plans and test cases are linked by tooling

TEST PLANS DOCUMENT

○ what we will test in functional terms, and

○ Test cases are implemented in code

○ Test plans and test cases are linked by tooling

○ This way, we avoid redundancy

PRINCIPLES

- Combinatorial testing
  - Mathematical approach, *pairwise* or *all ways*
  - Using business knowledge to break down

WHAT CAN POSSIBLY AFFECT THE OUTCOME OF TESTS

Input parameters

- User ID
  An integer (4294967296 possible values)
- Include invoices
  A Boolean (2 possible values)
